## EXPERIENCE

### Software Developer

#### Maids.cc

📅 June 2022 – Present

Performance & Security team - In-house tooling (quick action, small projects) including:

- Knowledge Base search site for customer service reps.
- Desktop App for Data Corrections Management.
- Performance Dashboard & Aggregating Systems Health Data.

## COURSES & TRAINING

### Odoo Framework & ERP

#### EBTECH

📅 February 2022 – April 2022

- Use Odoo Sales, Accounting, Inventory, CRM modules.
- Create and maintain an Odoo ERP module.
- Take full advantage of the Odoo ORM Layer and its features.
- Build User Friendly UI using Odoo's built-in xml web views.

### Google IT Automation with Python

#### Google

- Learned about Git (VCS) Interacting with the Operating System, Debugging and Configuration Management.
- Worked on Automating Real-World Task Capstone using Python Batteries Included Ideology.
- Reinforced my what I Learned in Python 3 Programming Specialization By The University of Michigan where I built an OCR newspaper analyzer as a capstone project.

### Developing Applications with Google Cloud

#### Google

- Understood the fundamental services and concepts of cloud computing.
- Learned about various deployment strategies.

### Functional Programming in Scala

#### École polytechnique fédérale de Lausanne (EPFL)

- Gained a deep understanding of Scala and how it leverages the best of both worlds the Functional and the Object Oriented.
- Enforced my java skills since scala is interoperable with java.
- Learned about Reactivity, Parallelism and Spark.
- Got comfortable with immutability, Signals, Futures and Promises.

## LIFE PHILOSOPHY

*"The More You Know, the Easier It Is to Learn."*

## EDUCATION

### M.S. in Big Data

#### Higher Institute of Applied Sciences and Technology (HIAST)

📅 October 2024 – On going...

### B.S. in Software Engineering & Artificial Intelligence

#### Higher Institute of Applied Sciences and Technology (HIAST)

📅 October 2018 – 2023

## PROUD OF

#### Stegasus

Text based Steganography Engine Using a multi phase encoding.

#### meScheduler

My first project which helped me learn at first hand about tackling a real world problem using Search Algorithms in a Typescript-React PWA utilizing Web-workers.

#### Best Programming and Algorithms

OpenSumo ARC3-Syria 2017

## TECHNICAL SKILLS

React

PHP

MySQL

Docker

Typescript

Electron.js

Tailwind

Express.js

node.js

Java

Spring Framework

ASP.net

## LANGUAGES

English

Arabic

## NOTES

- Links to certificates and other details are in my LinkedIn account and my Github account.
- Mentioned certificates were provided by Coursera.
- I'm using  $\LaTeX$  altavc for this.
